

The Beastie Boys, Live Wire

I know where you got to be going but you don't know why
I see things I ought not to know but I can't help life
You never knew my heart for you was monster size

You're a live wire
You're a live wire

Let me know if you want to check out for the all time high
My man told me long hellos and short goodbyes
But you are something else I love you please don't die

You're a live wire
You're a live wire
