

# The Beloved, Celebrate Your Life

where is the hope today  
and where is the passion?  
it seemed just like yesterday  
love was in fashion

a rumour that was spread around  
all the answers had been found  
and then it felt like moving on  
and suddenly was gone

you want a reason, i'll give you reason  
don't change your ideals with every season  
just look inside yourself for explanation  
and make your own life a celebration

do you dream of better days  
gazing through a purple haze  
bathed in ultra-violet rays  
or do you want your conscience raised?

you want a reason, i'll give you reason  
don't change your ideals with every season  
just look inside yourself for explanation  
and make your own life a celebration

you've got the power, power to be strong  
an education that should be lifelong  
so don't be a victim of expectation  
just make your own life a celebration

you want a reason, i'll give you reason...
