

The Beloved, Let The Music Take You

another song about dancing
nightclub chance romancing
feel the rhythm - let it flow
energise you - let it go
free your body, yeah!
free that spirit in there

let the bassline move you
with a groove that can soothe you
work it till you drop - never let it stop

just let the music take you
that one step higher
make you, shake you, wake you
with your desire

just let the music take you
that one step higher
make you, shake you, wake you
with your desire

all you disco divas
just shake your thang
in a dancefloor fever
yeah it's happening!

just let the music take you
that one step higher
make you, shake you, wake you
with your desire

just let the music take you...
