## The Black Maria, Mirrors And Cameras

Burn away the best part of everything And strip away all that I am, I dispose of the man, We won't make it so why should we stop it? I wake up again in someone else's skin, This body acts like a chain and I can't get out of it... We won't make it so why should we stop it? Burn away the best part of everything And strip away all that I am, I dispose of the man, We won't make it so why should we stop it? I wake up again trought I was never really here, I'm a shell for a gohst and a grave for a man We won't make it so why should we stop it? Burn away the best part of everything And strip away all that I am, I dispose of the man, We won't make it so why should we stop it? Mirrors and cameras, I reach for razor blades, I want to cut myself, I don't like what I see We won't make it so why should we stop it? Burn away the best part of everything And strip away all that I am, I dispose of the man, We won't make it so why should we stop it?
