

# The Blackout!, Life and Death In Space

With stars crossed we take our cues  
"Show no remorse" is what you said to me  
Dangerously we undo  
Falling down to Earth, landing in the sea  
All that I know and adore  
I told you nothing but the truth  
Comes crumbling to the floor  
Me lying here is your proof  
God, I need out  
God, I need out, need out again  
Gotta find my way back to you  
God, I need out  
God, I need out, need out again  
Gotta find my way back to you  
Home... (We've gotta find our way home)  
Home... (We've gotta find our way home)  
Home... (We've gotta find our way home)  
Home...  
Falling faster from the sky  
I sit here, lost on your bed  
Unmissable look in your eye  
Always torture running through my head  
Takes me to where I can't go  
Take my hand, and I'll lead you to safety  
By now the ground is too grown  
All I think about is you and me  
God, I need out  
God, I need out, need out again  
Gotta find my way back to you  
God, I need out  
God, I need out, need out again  
Gotta find my way back to you  
Home... (We've gotta find our way home)  
Home... (We've gotta find our way home)  
Home... (We've gotta find our way home)  
Home...  
We're flying far from home  
So close your eyes and hope  
We're flying far from home  
So close your eyes and hope  
Close your eyes and take into the night  
Why don't you forget about my history?  
Close your eyes and take into the night  
Why won't you just forgive me?  
Close your eyes and take into the night  
Why won't you show me your conscience?  
Close your eyes and take into the night  
Walking home, feeling hopeless  
We're nothing but satellites in the sky  
We're nothing but satellites in the sky  
We're nothing but satellites in the sky  
We're nothing but satellites in the sky  
We're nothing but satellites in the sky  
We're nothing but satellites in the sky  
We're nothing but satellites in the sky  
We're nothing but satellites in the sky
