

The Blow Monkeys, Out With Her

They say it's meant to change your life
When you fall in love
If this is what it's like
I couldn't ask for more

You put out the fire
But I'm not too vain to make a change
Even though it's not my style I try
To say goodbye
And I never ever wanted to be part of this

When I'm out with her
You know that I don't care
You know that I don't care
When I'm out with her
You know that I don't care
You know that I don't care

If you choose another
Well I won't suffer
It's true you never needed anybody, anytime
So the guilt is mine

You make everything
And I know I shouldn't care at all
And I know I shouldn't care at all but then
He's already there
And I never ever wanted to be part of this

When I'm out with her
You know that I don't care
You know that I don't care
When I'm out with her
You know that I don't care
You know that I don't care

Must have been something in the way you smiled at me
When you put me at ease
I don't ask you for pleas
Do you feel
Do you feel
Do you feel
The way I do?
(Feel it)

I could say I love you
(Feel it)
I could say I love you
(Feel it)
I could say I love you
(Feel it)
I could say I love you
(Feel it)
But you fall asleep into a corner
Yeah...
But you fall asleep into a corner
(You fall asleep into a corner)
But you fall asleep into a corner
(a corner)

Say you can't take no more
I can't take no more

When I'm out with her

You know that I don't care
You know that I don't care
When I'm out with her
You know that I don't care
You know that I don't care

When I'm out with her
You know that I don't care
You know that I don't care
When I'm out with her
You know that I don't care
You know that I don't care
