

The Calling, Your Hope

When your hope is lost
When your hope is fading...

What would you do if you had
Just one little pill in your hand
That changed around all you could be
That helped you forget what you've seen
If all you ever wanted, was to let go...
(There are so many things that we just don't know about)

CHORUS:

When your hope is lost and you can't take it
Just follow your heart don't let them break it

You think it would be all right
To live someone else's life
Trust what you already have
Cause once you fall in, you can't turn back
If all you ever wanted, was to let go...
(I think we all know what it's like to feel alone)

CHORUS

You've got to throw those thoughts away
Before you make a big mistake
You've lost control, been thrown off track
But now it's time, to take it back, take it back
You have to want to
You have to want to...

(There are so many things)

CHORUS

When your hope is lost
When your hope is fading
When your hope is lost...
