

# The Chemical Brothers, Setting Sun

You're the devil in me I brought in from the cold  
You said your body was young but your mind was very old  
You're coming on strong and I like the way  
The visions we had have faded away  
You're part of a life I've never had  
I'll tell you now it's just too bad

You're coming on strong  
You're showing your colour  
Like a setting sun
