

# The Church, Take It Back

She said thanks for the present  
Thanks for the future too  
But it'll take something better than this creature you left  
To make me come back to you

You better take it back (take it to the bottom)  
Take it back (take it to the bone)  
Take it back (take it anywhere I go)  
Take it back (take it all night long)

When I first arrived in this brand new life  
With my halo and clean slate  
But then I dabbles and I meddled until I couldn't backpedal  
And I hate my fate

I want to take it back (take it to the bottom)  
Take it back (take it to the bone)  
Take it back (take it anywhere I go)  
Take it back (take it all night long)

She said thanks for the memories  
She said thanks for the booze  
She said thanks for everything that made me sing  
These elemental breakdown blues

Why don't you take it back (take it to the bottom)  
Take it back (take it to the bone)  
Take it back (take it anywhere I go)  
Take it back (take it all night long)
