## The Cure, The Loudest Sound

Side by side in silence They pass away the day So comfortable, so habitual... And so nothing left to say

Nothing left to say Nothing left to say

Side by side in silence His thoughts echo round He looks up at the sky... She looks down at the ground

Stares down at the ground Stares down at the ground

Side by side in silence They wish for different worlds She dreams him as a boy... And he loves her as a girl

Loves her as a girl...

And side by side in silence Without a single word...

It's the loudest sound It's the loudest sound...

It's the loudest sound I ever heard
