

# The Cure, Us Or Them

There is no terror in my heart  
Death is with us all  
We suck him down with our first breath  
And spit him out as we fall

There is no terror in my heart  
No dread of the unknown  
Desire for paradise to be...  
We love this on our own

No I don't want you anywhere near me  
I don't want you anywhere near me  
Get your fucking world out of my head  
I don't want you anywhere near me  
I don't want you anywhere near me  
Get your fucking world out of my head  
I don't want your 'us or them'  
No I don't need your 'us or them'  
Oh I don't want your 'us or them'  
I don't need your 'us or them'  
Your 'us or them'

'I live in knowledge of real truth  
And all my gods are great!  
The doleful cant of a bigot  
Blinded by fear and hate

You live in knowledge of real truth?  
Oh the biggest lie I heard  
How sick in your mind and soul  
To be scared of my voice and my words

Oh you don't want me anywhere near you  
You don't want me anywhere near you  
Get my fucking head out of your world  
You don't want me anywhere near you  
You don't want me anywhere near you  
Get my fucking head out of your world  
I don't want your 'us or them'  
No I don't need your 'us or them'  
Oh I don't want your 'us or them'  
I don't need your 'us or them'  
As the only way this ever ends is 'me'
