

The Draft, Hard To Be Around It

It got into me today
like acid eating me away
Spent all your life on something
just to burn it down to nothing
It got into me today

So what are we waiting on
It's hard just to be around it
It's hard just to be around it

Just don't ask for something more
It's everything but open war
And now nothing seems to make sense
and we all get so frustrated
Just don't ask for something more

So what are we waiting on
It's hard just to be around it
It's hard just to be around it
It's hard just to be around it

It's hard just to be around it
It's hard just to be around it
It's hard just to be around it
It's hard just to be around it
