

# The Feeling, I Love It When You Call

I found a switch  
Turned it on  
Hit the ditch  
And carried on  
I was so near  
Now youre so far  
Are you quite sure  
Just who you are

O I IIII  
O you could chose a friend but you dont seem to have the time  
O I IIII  
I wonder if you ever get to say whats on your mind  
O take a little time, take a little time

I love it when you call  
I love it when you call  
I love it when you call  
But you never call at all  
So whats the complication its only conversation  
I love it when you call  
But you never call at all

Remember me, I used to be the best time buddy  
Who you couldnt wait to see  
But getting old, it takes its toll  
And hearts getting broken lead to people growing old

O I IIIII  
Im flipping with a coin thats got a tail on either side  
O I IIIII  
Im gonna be the one who makes you stop and realise  
You could have it all  
We should have it all

I love it when you call  
I love it when you call  
I love it when you call  
But you never call at all  
So whats the complication its only conversation  
I love it when you call  
But you never call at all

Yea I wonder where you been  
Yea I wonder who you seen  
And I hope you find your train  
When you do a living and hope its all it seems

I love it when you call  
I love it when you call  
I love it when you call  
But you never call at all  
So whats the complication its only conversation  
I love it when you call  
But you never call at all
