

The Flaming Lips, Ego Tripping At The Gates Of Hell

I was waiting on the moment,
But the moment never came
All the billion other moments
Were just slipping all away

(I must have been tripping) We're just slipping all away
Just ego tripping

I was wanting you to love me,
But your love, it never came
All the other love around me
Was just wasting all away

(I must have been tripping) Was just wasting all away
(Just ego tripping) Was just wasting all away
Must have been tripping

I was waiting on the moment
But the moment never came
(Must have been tripping) But the moment never came
(Just ego tripping) But the moment never came
(Must have been tripping) But the moment never came
(Just ego tripping) But the moment never came
(Must have been tripping) But the moment never came

But the moment never came...
