

# The Flaming Lips, What Is The Light?

what is the light  
that you have  
shining all around you?  
Is it chemically derived?

Cause if it's natural,  
something glowing from inside  
shining all around you  
it's potential has arrived

Love is the place  
that you're drawn to.  
Looking into space  
it surrounds you.  
Love is that face  
that you're drawn to

What is the light  
that you have  
shining all around you?  
is it chemically derived?
