

# The Goo Goo Dolls, Lucky Star

If I could walk a straight mile  
And write it down in shorthand I could show you  
If you want me to  
And if I had an hourglass  
I'd save the grains of time I spent with you  
That's what I'd do

But I remember  
You always said it could be great  
And I knew it could be

Well there's a way you look at things  
That no one needs to know but you  
And you shared them with me  
Like every time the leaves would fall  
You promised me that they'd be back again  
And I believed in you

You always said it could be great  
But I hadn't time to waste  
Now it seems that I've gone too far

As bright as you are don't get burned by your lucky star  
Bright as you are don't get burned by your lucky star

Written down in hard bound books  
The way things used to be they ain't for me  
I'd swear they're all for you  
Ri said sugar, gram said shoot  
Her mom said shit I don't know what she'll do  
As if it's up to you

But I remember  
You always said it could be great  
But I hadn't time to waste  
Now it seems that you've gone too far  
As bright as you are don't get burned by your lucky star  
Bright as you are don't get burned by your lucky star  
Your lucky star will burn you  
Your lucky star can turn you 'round  
Your lucky star will burn out  
Your lucky star can turn you 'round
