

The Goo Goo Dolls, String Of Lies

I've got no politics no influential friend or two
I've got ideas but it's nothing I picked up at school
I might be running but I'm never running back to you

And here's a letter from the real world I don't expect you'll reply
And anything you're gonna tell me it's just another lie

I had to wait so long that weeks and months that passed me by
You've got no power and my situation don't apply
You ask me how I am I lie and say I'm doing fine

And with your sugar sweetened alibi there was a truth I never knew
And all the attitude you gave me it's coming back to you

String of lies it's always compromise with you
String of lies you know there's nothing left to do
String of lies it's been a string of lies with you

And here's a letter from the real world I don't expect your reply
And anything you're gonna tell me it's just another lie

String of lies we always compromise for you
String of lies you know there's nothing left to do
String of lies it's been a string of lies with you
String of lies we always compromise for you
And here's a letter from the real world
