

# The Incredible String Band, Moon Hang Low

let the moon hang low low down in the sky  
the lower it goes the higher we fly  
one small candle is just enough light  
for endless moments of love bright

and the more I know you the more I know  
and the more I love you the more love grows

let the fire burn way down low  
in those early hours easy hours  
when the world turns slow.
