

# The (International) Noise Conspiracy, Only Lovers

You can choke on easyways while we stay up every night and every day  
Doesnt matter what you say 'cause your ways are all so fucking lame  
Yeah and we're all coming over while you take your pills and we watch you fall asleep  
Yeah and we're all going to dig the sound on the new beat  
There's no way that your going to make it out of here in time  
'Cause only lovers, only lovers are going to be left alive  
Feel that heat that we are all taking about, a realization of our wildest schemes  
Your lack of passion and your lack of dreams pretty much made you obsolete  
No more sitting down, shutting up, taking shit, we could never dream of it  
No more sitting down, shutting up, taking shit, we could never dream of it  
Yeah and we all going to scream about it  
Yeah and the kids are finally going to reign  
Yeah get rid of all the adults they couldn't take the strain  
There's no way that your going to make out of here in time  
'Cause only lovers are going to be left alive  
You can choke on easyways while we stay up every night and every day  
Doesn't matter what you say 'cause today your traditions are completely dead  
Yeah and we're taking over, yeah the old ways are going down  
Yeah we're all dying of laughter, yeah while we dig the new sound
