

The Juliana Theory, Goodnight, Starlight (Demo)

Close your eyes, you're beautiful when you're sleeping
Tonight may all your dreams come true.
It's so nice to hold you while you're sleeping
When I'm sleeping next to you
And what we got is something special,
and what we are is a perfect match,
and three-thousand miles can never come between us
No matter what we do it's always you and me
and it's always me and you.

I know sometimes it's lonely while you're sleeping,
Well it's lonely for me too.
It's alright just know that while I'm sleeping
That I'm dreamin of you

And what we've got is something special
and what we are is a perfect match
and three-thousand miles can never come between us
We always have the stars to wish upon from where I'm at,
and where you are.

Goodnight
Goodnight
Goodnight
Goodnight, love
Goodnight...
