

The Kelly Family, Stars Fall From Heaven

It's cold outside and the moon is bright
And I'm alone tonight
If I was a star that shines so bright
I'd shine my love to you
It's not the words you say
Neither the ways they're said
And it's not the things you do
That makes me wanna fly to you
Oh baby yeah
When a star falls from heaven don't ask me why
When a star falls from heaven gonna see me cry
When stars fall from heaven I don't know why
When stars fall from heaven gonna see me cry
It's cold outside it's dark out here
You're far and I'm alone
Stars shone bright as the tears rolled down
My burning cheek's as I cry
It's not the words...
When a star...
When stars fall...
