The Kinks, Wall Of Fire

Standing at the end of the horizon
Looking at another setting sun
Nature gave us all these toys to play with
But we've abused them, each and every one
They stretched the chord, snapped the wire
Lit the fuse but can't retire
We're going to the wall of fire
Tip-toeing on the great high wire
Let's have a real fire

The city slickers built the great illusion
Now they're the first to crumble in the sun
Now we're going through the wall
Let's see the flames before we fall
We're going through the wall of fire
Let's have a real fire
Tip-toeing on the great high wire
Through the wall of fire

We drove on many rocky roads together Through the storms and hurricanes we rode Unified so no one could destroy us We stretched the bounds But always kept the code Liberals shout and cause concern Forget next week while we all burn Let's run right through the wall of fire Let's have a real fire Death-defying while the flames grow higher Through the wall of fire Let's go through the wall of fire Running through the wall of fire
