## The Linda Lindas, Growing Up

Growing up isn't something we can make happen when we want it to But since we're all growing up together I guess I'll grow up with you

We can take turns taking the reins Lean on each other when we need some extra strength We'll never cave or we'll never waver We'll always become braver and braver

We'll dance like nobody's there
We'll dance without any cares
We'll talk bout problems we share
We'll talk bout things that ain't fair
We'll sing bout things we don't know
We'll sing to people and show
What it means to be young
And growing up

Under the table, we'll whisper in each other's ears We'll share our hopes and dreams, and all our other greatest fears And when we get burned from jumping in the fire We'll never tire, cause we'll always find ways to fly higher

I make as many good memories as I can When there are nights I can't sleep, it's okay in the end I know what I do now makes me me Wherever we go, wherever we go we...

We'll take the good with the bad All of the times that we'll have Make every moment last We'll have each other's backs Cause in the end we don't know We don't know where we will go We don't know, so There's still a little more Growing up
