The Maine, Right Girl

Got caught running up a tab

Couldn't drive home so I had to share a cab

Introduced herself by her last name

The kind of girl you steal from the football team

Brought up a silver spoon mess

Always trying to tear off her Catholic dress

Told me she's over this place

Needs to feel the mid west wind in her face

But the alcohol made its way down

She was the last thing that I saw last night before I hit the ground

Oh god I did the wrong thing to the right girl

My mind was only in it for a minute

Had a bad fling with a good girl

I was stupid and dumb not giving a

The blank stare out the window

If I could just sober up I could just admit

I did the wrong thing to the right girl

It was your world, baby and I just lived in it

It was your world, baby and I just lived in it

I've never been the best with my mouth

Try to stay smart but the dumb comes out

Maybe I'm shy, I drive an old car

Maybe I'm amazed that I got this far

And I got my stand-bys waiting on the line

But the hardest part is knowing that it won't be her this time

Oh god I did the wrong thing to the right girl

My mind was only in it for a minute

Had a bad fling with a good girl

I was stupid and dumb not giving a

The blank stare out the window

If I could just sober up I could just admit

I did the wrong thing to the right girl

It was your world, baby and I just lived in it

It was your world, baby and I just lived in it

Please, please, baby come back

She came back

Thought she had it all planned out

Went to marry some guy she had talked about

A tear in her dress and a tear in her eye

And just like that her whole life flashed by

She won't remember what you said last night

That if you ever needed someone to pick up the pieces in your life

Oh god I did the wrong thing to the right girl

My mind was only in it for a minute

Had a bad fling with a good girl

I was stupid and dumb not giving a

The blank stare out the window

If I could just sober up I could just admit

I did the wrong thing to the right girl

It was your world, baby and I just lived in it

It was your world, baby and I just lived in it

Oh, it was your world

All yours

(Please, please baby come back [x4])

Yeah it was your world baby and I just lived in it
