

# The Messengers, California Soul

Like a sound you hear  
That lingers in your ear  
But you can't forget  
From sundown to sunset

It's all in the air  
You hear it everywhere  
No matter what you do  
It's gonna grab a hold on you

It's California soul, California soul

They say the sun comes up every morning  
And if you listen oh so carefully  
The winds that ride on the high time  
Whistles a melody  
And so the people started to sing  
And that's how the surf gave birth untold  
To California soul, California soul

When you hear the beat  
You wanna pat your feet  
And you've got to move  
Because it's really such a groove

Puts a brand new kind  
Of thinkin' in your mind  
And you can't go wrong  
Cause you're groovin' all day long

It's California soul, California soul

They had the melody and the beat  
But it still didn't seem complete  
Until they saw two lovers kissin'  
They knew just what was missin'

So happy they were rockin and reelin  
Because they added that lovin feeling

To California soul, California soul

Like a sound you hear  
That lingers in your ear  
But you can't forget  
From sundown to sunset

It's all in the air  
You hear it everywhere  
No matter what you do  
It's gonna get a hold on you

When you hear the beat  
You wanna pat your feet  
And you've got to move...
