

The Mission, Heat

Let me lay waste with gentle persuasion
Let me lay down
To sweat in the heat
On the back of beyond we laugh at all reason
And in the light of it all
There's no need to retreat
And the heat comes down
And the heat comes down
And hand in hand
We melt in the heat
We melt in the heat
We melt in the heat
We melt in the heat

Save for the asking fortune favours the brave
Let me take strength
From the child in your eyes
And between the lines we dance into the mirror
And a grateful embrace
Lays in wait for the sun to rise

And the heat comes down
And the heat comes down
And hand in hand
We melt in the heat
We melt in the heat

We melt in the heat
We melt in the heat

Please don't take it hard when
I give myself to you
And love will come easy
When you deign to swallow my pride
Before I ever touch your lips
You promise the very earth to me
And tender hearts and broken down
When you take me deep inside

And the heat comes down
And the heat comes down
And hand in hand
We melt in the heat
We melt in the heat
We melt in the heat
We melt in the heat
We melt in the heat
We melt in the heat
We melt in the heat
Melt in the heat
