

# The Monkees, You And I (Justus Version)

After all the spotlights and the flowers  
After all the parties and goodbyes  
There was something in the air  
Something that we realized we would always share

And it was You and I  
You and I

After all the music and the madness  
After all the late night fantasies  
We knew that we would make it through  
There was little in our way  
Nothing they could do

'Cause it was You and I and promises not broken  
You and I and magic memories  
After all was said and done they never understood  
How we always made it. We knew we always would

'Cause it was You and I  
You and I

Now it seems that we are still together  
And all the others never made it through  
Someday they'll learn our secret way  
It isn't such a secret, it isn't hard to do

'Cause it's You and I and promises not broken  
You and I and magic memories  
After all was said and done they never understood  
How we always made it. We knew we always would  
'Cause it was You and I  
You and I  
You and I
