

The Naked And Famous, Hearts Like Ours

Orders in to risen lines
We're alone but side by side
We hate to dream, we hate to dream
Nothing here is what it seems

There's an animal inside
There's a fear that won't subside
Of all the things I'll never do
Will I ever follow through
There's an animal inside
There's an animal inside

Half awake and almost there
(?) if be better still
We aim to be, we aim to be
All the time and energy

Silence
Silence

Could we try to reinvent
Feed the head, the common sense
Through the streets and avenues
Climbing up the walls with you
Climbing up the walls with you

Half awake and almost there
(?) if be better still
We aim to be, we aim to be
All the time and energy

Silence
Silence

Leave this place behind in silence
And the way we find silence
Leave me to the edge of night
To the dawn the end of time
Till the fire blazing light
Shines again within our eyes
Half awake and almost there
Even if the angels swear
We aim to be
We aim to be
All the time and energy

Half awake and almost there
(?) if be better still
We aim to be, we aim to be
All the time and energy
