

# The Night Flight Orchestra, The Sensation

Maybe it was life that just took us aside  
Saying you will never make it through  
Biding our time through a bottle of wine  
Spending days in motion, me and you

If it ain't moving at the highest degree  
Then leave this city, fly away with me

Prove it to me now feel the fire inside  
I am more than you ever could wish for  
A flame for the awake on the wings of our time  
You are still here in spirit won't let you go... don't you know..

Days were passing by with the sun in our eyes  
There was really nothing better to do  
A surreal state of mind in an airport at night  
Fell in love again with someone new

The dream is over but the journey's on  
Still the sirens call your name  
Escaping with your mind to a distant shore  
From the never-ending pain

If it ain't moving with a deadly speed  
Then leave this city, fly away with me

Prove it to me now feel the fire inside  
I am more than you ever could wish for  
A flame for the awake on the wings of our time  
You are still here in spirit won't let you go...

Playing side by side, nowhere else we could go  
You could feel the sensation take hold of you  
A never-ending haze of electric souls  
You are still here in spirit.. so real, so true..

Prove it to me now feel the fire inside  
I am more than you ever could wish for  
A flame for the awake on the wings of our time  
You are still here in spirit won't let you go...

Playing side by side, nowhere else we could go  
You could feel the sensation take hold of you  
A never-ending haze of electric souls  
You are still here in spirit.. so real, so true..
