

The Nightwatchman, Night Falls

She want him, want him not to go

He said I, Ive got to go

She whispered I, I love you so

He said I, Ive got to go

[Chorus]

Night falls on the river valley

Night falls on the minds and fields

Night falls on the just and unjust

Night falls

In the next town theres trouble, needs straightening out

Theres dynamite under the porch

Me and my four kids are hungry

A mans yelling through the screen door

[Chorus]

All they can in the morning

Shoulder to shoulder, end to end

You dont have to speak

You just have to stand

Steve, Sud and dad there on the bridge

Local three ninety three was born

A black and white picture of the colon of the lord

The dam was broken, the river comes

[Chorus]

She want him, want him not go

He said I, Ive got to go

She whispered I, I love you so

Night falls

Night falls
