

# The Ocean Blue, Just Let Me Know

First she came right into my life  
You know my life wasn't much of a life  
Couldn't believe this could happen to me  
Who, oh who, could ask for more

Just let me know  
Just let me know  
What you want from me

You were a friend when I hadn't a friend  
One on whom I could always depend  
Couldn't believe this could happen to me  
Who, oh who, could ask for more

Just let me know  
Just let me know  
What you want from me

Wish I knew what you were thinking deep inside  
Feel, those feelings that you hide  
Wish in you I could confide  
All my hopes, my fears, my love

First she came right into my life  
You know my life wasn't much of a life  
Couldn't believe this could happen to me  
Who, oh who, could ask for more

Just let me know  
Just let me know  
What you want from me
