

# The Power Station, Lonely Tonight

Lonely tonight, lonely tonight, lonely tonight, lonely tonight  
Lonely tonight, lonely tonight, lonely tonight, lonely tonight

We're enchanted, struck by lightning  
What can we do when the feeling's so exciting?  
We just ran into each other  
Now we can't refuse, 'cos the night is so inviting  
You sure took me by surprise, I ain't fooling

Everything was synchronized in a movement  
When I met you, I knew there was a reason  
Every moment that we've shared guarantees it

We.. we won't be lonely tonight  
Must be miles ago since we first said "hello";  
We. we won't let us out of our sights  
Passion has to grow, darling because we know  
Riding our tide, luck is with us  
No risk to take, when we've got so much to give us  
Fate's on our side it's our moment  
We're getting warm, 'cos we give each other shivers

Yeah, let's keep the fire alight  
Nothing can go wrong, we're together for now on  
Oh, all the love we excite  
Loneliness has gone, did it take us so long  
Can't remember life without your music  
Oh, there never was a doubt, don't we prove it?  
You sure took me by surprise, I ain't fooling  
Everything is synchronized in a movement

We're enchanted, struck by lightning  
What can we do when the feeling's so exciting?  
We just ran into each other  
Now we can't refuse, 'cos the night is so inviting

We won't be lonely tonight  
Must be miles ago since we first said "hello";  
We won't let us out of our sights  
Passion has to grow, darling because we know  
Yeah, let's keep the fire alight  
Nothing can go wrong, we're together for now on  
Oh, all the love we excite  
Loneliness has gone, did it take us so long..
