

The Presidents of the United States of America, V

under the island
middle of a mountain
there is a big bad
boomin' system
blowin' speakers
woofers and tweeters
amplifiers
melted wires
the party's exploded
the core is corroded
underground
the Puget Sound
cause a shiftin'
and a driftin'
big black boom box
stuck in the hot rock
it's in there flowin'
it's in there growin'
you don't believe me
that this scenery
could be a
cold blooded killer

it's gonna blow
volcano
it's gonna blow
volcano
it's gonna blow
volcano

now the island is shiftin'
the plates are liftin'
the core is creamy
docile and dreamy
stopped up and steamy
happy campers
poop in their pampers
when the mountain
becomes a fountain
of white hot lava
molten magma
super sonic
plate tectonics
stereophonic
lava and tonic
the boom is bionic
Sony shutdown
Magnavox meltdown
ballistic breakdown
hi-fi heatwave
lo-fi lava cave
that sulfur smell is
Mt St. Helens
Pompeii was yellin'

it's gonna blow
volcano
it's gonna blow
volcano
it's gonna blow
volcano
it's gonna blow
volcano

go!
