

The Project Hate MCMXCIX, With Desperate Har

Leave me breathless, embrace the mournful whore
I am so cold
Apart from heaven, my paradise is torn
Why am I so cold?
Deserted..!
I am of those who would oppose me
And I arose from those who owns me
Deserted..!
By the ones who breed me
The very same who makes me bleed
Leave me helpless, and let me whore once more
It gets so cold in here
Despite the colors, this is my private hell
I bid farewell, I bid farewell
Leave me breathless, and let me die once more
My soul is cold
It could be heaven, but disguised as hell
I bid farewell
No more!
The more I take, the more I crave
The more I love, the more I hate
The more I feel, the more Ill be
Yeah!
The more I breathe, the more I die
The more I laugh, the more I cry
The more I see, the more Ill bleed
Eternal hate!
Nail my hands my love and watch my eyes wide shut
Walk into me, slip into my skin and never well part again
Im turning insane, I turn them insane
My god, show me what this is
Dont let this pass me by
Ill turn You insane, Im turning insane
My god, show me what this is
Dont let this pass us by
As I see it, I am divine
In the footsteps of desparation we walk
Your face is pale and so is mine
Embrace the warmth within my heart
Dance the endless dance and watch the shadows pass us by
I am of those who would smite me
I am of those who would oppose
The more I want, the less I get
The more I kill, the less I regret
The more I speak, the less you hear
The more I am, the more youll fear
The more I want, the less I get
The more I kill, the less I regret
The more I see, the less you hear
The more I hate, the more youll fear
And so we lie, and so will I
So will you, so will you
The more I want, the less I get
The more I kill, the less I regret
The more I want, I kill
The more I want, I kill, the more I want
The more I take, the more I crave,
The more I love, the more I hate,
The more I feel, the more Youll bleed
The whore I breathe, the whore who dies
The whore who laughs, the whore who cries
The whore I see is the whore to bleed
