

The Raconteurs, Salute Your Solution

I seem to think I think I got a little situation
So listen to me sister listen maybe you can help
I think I give a lot of problems my consideration
But not for me it always seem to be for someone else

Why other people always seem to just be on vacation
What do I get from it I don't get anything at all
I'm like a trash can holding all the information
And every single time it make me feel like two feet tall

woo woo
I Salute your solution, I salute your solution

I find myself just looking well beyond my best intentions
Ignoring any kinda pause I might receive at all
While I always seem to find the road is tough to satisfaction
I find a ridicule that isn't good for me at all

And if there's one little answer to this complication
So wise the words will help me settle what is on my mind
There's only one I'm only taking getting and receiving
There's only one I'm taking
And only one I'm taking

And only one I'm taking
And only one I'm taking
And only one I'm taking
And only one

And I got what I got all despite you
And I give what I get just to spite you

And I got what I got all despite you
And I give what I get just to spite you

And I got what I got all despite you
And I give what I get just to spite you

I find myself just looking well beyond my best intentions
Ignoring any kinda pause I might receive at all
While all the others seem to find themselves with satisfaction
I find a ridicule that isn't good for me at all

But if there's one little answer to this complication
So wise the words will help me settle what is on my mind
There's only one I'm only taking getting and receiving
There's only one I'm taking
And only one I'm taking

And only one I'm taking
And only one I'm taking
And only one I'm taking
And only one
