

# The Replacements, My Little Problem

The feeling you're gettin'  
Is downright depressing  
Do you foresee  
A way out for me

Well it's not my problem  
To help you solve them  
Do you wanna go through it  
Do you really wanna do it

Don't you wanna be my little problem  
Don't you wanna be my little problem

Probably tell your friends  
You were on a bet  
All the many pieces  
That you're never gonna mend

Let's put it together  
Some way, somehow  
Something's wrong  
But I can't stop now, no no no no no no no no

Don't you wanna be my little problem  
Slide up next to me any time  
Don't you wanna be my little problem

I never had a problem  
Till I knew you'd try to solve it  
Well I never had a problem  
Don't you...  
Till I told you, yeah

The feeling you're gettin'  
Is downright depressing  
Do you foresee  
A way out for me

I never had a problem  
Till I met you try to solve 'em  
Oh I never had a problem  
Don't you wanna  
Don't you wanna be my little problem  
Shutup next to me any time  
Don't worry I can see my little problem  
Don't you wanna be my little problem

My little problem  
My little problem
