

# The Replacements, We Know The Night

Best things in life don't come for free  
Best things in life always come unexpectedly  
Well, we watch the clock and it comes as no surprise  
Till the day is late and we let out a sigh  
'Cause we know the night could fall at any time

With scissors and a comb I cut my lawn  
And there's no one in the world I'm counting on  
There's a war ragin' outside - I hope my grass stays green  
Till the day is late and we let out a scream  
'Cause we know the night could fall down on its knees

We don't know the prime lending ray  
And we don't know the pain of a broken day  
We don't know what's wrong or what's right  
We know the night...we know the night

You can bust your back from now till the sun goes west  
Best things always come when your mind's at rest  
In the afternoon, my mind ain't sleepy, it's preoccupied  
Till the day is late and we let out a sigh  
'Cause we know the night could fall at any time

Yeah, we know the night could fall at any time  
We know the night...we know the night
