

# The Send, The Fall

You're everywhere I see  
From molecules to trees  
And when you're far from me  
The earth falls to its knees

Everything falls apart  
When you're not here  
Everything falls apart  
I need to say "I need you"

You're in the air I breathe  
You're moving energies  
And like the river needs the sea  
I need to be released
