

# The Starting Line, Lasting Impressions

I'll wait till the clock strikes a nerve to spend some time with you  
I can't stand to depend on the shadow I cast alone we should  
For the sake of making a statement  
Let's make our presence known  
Let's show them what were made of  
We'll show up in our outfits we planned ahead  
To meet the qualifications for a special occasion  
Today is your day today is our day  
Making up for lost time  
Making a scene oh yeah

You've made a lasting impression  
And if it doesn't feel right  
Then I just can't go wrong  
I've been sleeping with the lights on  
So if I wake in the night  
Your picture is clearly in sight

So let's meet at the mouth for a kiss  
That's been so long overdue  
No thanks to the two thousands of miles  
And the touring we always do  
It makes me miss you more

You've made a lasting impression  
And if it doesn't feel right  
Then I just can't go wrong  
I've been sleeping with the lights on  
So if I wake in the night  
Your picture is clearly in sight  
I could explode  
Cause you just never you never know  
It would suit the moment perfectly

You've made a lasting impression  
And if it doesn't feel right  
Then I just can't go wrong  
I've been sleeping with the lights on  
So if I wake in the night  
Your picture is clearly in sight

You've made a lasting impression  
And if it doesn't feel right  
Then I just can't go wrong  
I've been sleeping with the lights on  
So if I wake in the night  
Your picture is clearly in sight
