

The Strange Familiar, I Know Your Name

What if I took a ride around the world with you?
There's nothing much left of you now
I know your name
I know your name
I know your game that you always loved to play
What if I rolled the dice and bet my life on you?
You'd let me down
I rolled a three
There's nothing much left of me now
And who's to blame?
I know your name
I know your name
I know your game that you always loved to play
I know you
I know this pain
I know you and I and all we had
Will never be the same
Did you get everything you want?
Now watch the curtain fall
On this tragedy
Not meant to be for us
I know you
I know your name
I know your name
I know your game that you always loved to play
I know you
I know this pain
I know you and I and all we had
Will never be the same
Did you get everything you want?
Now watch the curtain fall
On this tragedy
Not meant to be
It's a shame
What a waste
Oh, it's a shame
I know your name
