The Stranglers, 5 Minutes

I need a dream where I can live what I said
I need a place where I can make my bed
I need a hole where I'll find darkness now
And if you hassle me mister I might just loose my head

Five minutes and you're almost there Five minutes and you're almost dead Five minutes and you're almost there Five minutes and you're almost dead

They came home on Saturday night
They killed a cat and they raped his wife
And in their eyes there was fear and hate
And when they spoke, they spoke with knives

Five minutes and you're almost there Five minutes and you're almost dead Five minutes and you're almost there Five minutes and you're almost dead

Some say that I should hate them all
But I say that wouldn't help at all
I just wanna find those guys thats all
I just wanna find those guys thats all, that's all,

Five minutes and you're almost there Five minutes and you're almost dead Five minutes and you're almost there Five minutes and you're almost dead

The night time comes and the streets they ring With the fears of a thousand things But if you worry about your ports of call You'll never get nothing done at all

Five minutes and you're almost there Five minutes and you're almost dead Five minutes and you're almost there Five minutes and you're almost dead

Some say that I should hate them all But I say that wouldn't help at all I just wanna find those guys thats all I just wanna find those guys thats all I just wanna find those guys thats all, that's all
