

The Style Council, Everybody's On The Run

Everybody's on the run
When times get too rough and things get you down
When life gets too tough just take a look around

The money gets tight and there's no one around
No one in sight - you've got to understand

You're trying so hard to make your life right
They'll knock back down - but you won't be there for life

When times get too rough and things get you down
When life gets too tough just take a look around
