## The Style Council, Night After Night

Oh night after night - I still miss you baby Night after night - I still want your love Since you've been gone my whole life has changed Without your love mine's just not the same Day after day your on my mind Thinking of you takes up all of my time

I still miss you baby Night after night I still want your love

I toss and turn in my empty bed Memories of you keep dancing in my head Day after day I miss you more What I ever did since you walked out the door I still miss you baby

Night after night - I still want your love Night after lonely night

Day after day I miss you more What I ever did since you walked out the door I still miss you baby
