

# The Swift, Surround Me

You always know what to do when I need You.  
You come through. Make my old brand new.  
That's what You do.

You always know what to do.  
When life seems to much to take.  
And I can't hang on to it.  
You open Your arms and You tell me to hang on to You

(Chorus)  
At the top of my lungs  
At the end of my rope  
When there's nothing to lose  
And I'm fresh out of hope.  
You surround me.  
You surround me.  
You surround me.

Everytime I try, everytime I fail.  
You surround me, You surround me.  
(repeat)

(note: at this point, they break away from the main song  
and start repeating parts of earlier songs,  
which is an awesome way to end the CD).

And no one else can love me the way that You can  
I don't have to understand.

I was so lonely, so lonely, til I met You, my Jesus

Come on...

Small town underground and slip away...

More than gold, Your word speaks to me...

He's making the sunshine...

Wake up for the first time in your life...

La-la-la-la... until you soften your heart...

We were almost there... almost there... almost there...

Give me something more... that I've never seen before...

(Back to the main song now...)  
You surround me. You surround me. You surround me.

You... You surround me... You surround me... You surround me...

Everytime I try, everytime I fail  
You surround me, You surround me.  
You surround me, You surround me.
