

The Thorns, Long, Sweet Summer Night

There ain't no traffic lights in this little town
And lots of places where there's no one around

Out by the red water on the new grass
We'll wake up the morning making it last

On a long, sweet summer night
All the kisses you bring me get my temperature right
Long, sweet summer night
I will love you in the daytime too
If it's the only other thing that I do

Sun slips between the covers of night
We'll find each other in the fading light

Stars turn on slowly warm up the sky
We're only two people who are alive

On a long, sweet summer night
All the kisses you bring me get my temperature right
Long, sweet summer night
I will love you in the daytime too
If it's the only other thing that I do

Go on and keep me
Don't you ever leave me
Like a dog in the cold
Know you got me
When you need somebody to hold

On a long, sweet summer night
All the kisses you bring me get my temperature right
Long, sweet summer night
I will love you in the daytime too Cain
If it's the only other thing that I do
I'm all about giving it up to you
On a long, sweet summer night
