

# The Tubes, Space Baby

Space baby, you got no planet  
Space baby, you got no planet  
Got no home to give a name  
No air to breathe, but just the same  
I dig my atmosphere machine  
Space baby, you been so far  
Unknown face on an unknown star  
The time is now my life's begun  
I'm burnin' green like a rhomboid sun  
I've never seen a flower grow

It's a mystery to me just how my being came

to be and why it came here  
Maybe I'm not even human but I know

there's lots of room infinity  
There's got to be a time and place  
for me to cease this endless search  
and settle down with my own race  
and never, ever, ever be a Space Baby
