

# The Used, Dark Days

I see the way that the sun spits in your face  
Our love is to big for us to break  
You got me wishing for the stars in outer space  
I'm holding on to this life and love, and for...  
The possibility, you and me, let me be

I need to find a way  
To put this trouble behind us  
Can't spend my life in shame  
Making light of these dark days

I see the way that the rain spits in your face  
Just falling apart your lips to taste  
If I could give to you the stars in outer space  
I'm holding on to this life and love, and for..  
The possibility, you and me, let me be

I need to find a way  
To put this trouble behind us  
Can't spend my life in shame  
(ba da ba ba ba ba da)  
Making light of these dark days  
Another time and place  
To put this trouble behind us  
(ba da ba ba ba ba da)  
Can't spend my life in shame  
(ba da ba ba ba ba da)  
Making light of these dark days

So far away  
So far away  
(so far away)

Look into your heart  
And let time heed this place  
We're not so far away (we're not so far away)  
The possibility, you and me, let me be

I need to find a way  
To put this trouble behind us  
Can't spend my life in shame  
(ba da ba ba ba ba da)  
Making light of these dark days  
Another time and place  
(ba da ba ba ba ba da)  
To put this trouble behind us  
Can't spend my life in shame  
(ba da ba ba ba ba da)  
Making light of these dark  
Light of these dark  
Light of these dark days

All as one, you made me come home.  
All this, I'm one...to never follow.  
In all this I'm one...who will ever love you.  
All this I'm done....all this I'm done.
