

# The Used, Find A Way

Lay your head down just for now  
Space fills your mind you dream awhile  
The sun floods your room as you drown your  
Lungs full of breathing  
Your true love believe

Move let the stars suck you in  
Hold tight, the night's air and breathe again  
Let go and be burnt by the moon  
Your hands full of feeling your true love, Believe

I love you to death  
Could you love me to death

One more time to say I love you always  
and keeping faith letting love find a way
