

# The Valli Girls, Always There in You

Baby girl, close your eyes.  
You dont know the strength you have inside  
If I could I'd shelter you from all the pain that we all must go through  
But its up to you.  
The road is long it twists and turns  
But everything in life you live and learn  
No one ever said that life was easy or that all in love is fair  
But look inside your heart youll find the answer waiting there  
If you ever lose your way  
You dont have to be afraid  
Look inside to find a friend  
Wholl be with you til the end  
Many different roads to choose  
Searching for the strength to make it through  
But it was always there in you  
Hopes can fail and dreams can fade  
Rain can fall down on your big parade  
Maybe love will take your heart or break your heart  
There are no guarantees  
But love will always find you when you just believe  
If you ever lose your way  
You dont have to be afraid  
Look inside to find a friend  
Wholl be with you til the end  
Many different roads to choose  
Searching for the strength to make it through  
But it was always there in you  
The strength youre longing to find  
You know its true  
It was there all the time  
If you stand stronger, work harder, reach for the sky  
I know you will eventually fly  
If you ever lose your way  
You dont have to be afraid  
Look inside to find a friend  
Wholl be with you til the end  
Many different roads to choose  
Searching for the strength to make it through  
But it was always there  
It was always there  
It was always therein you.
