

# The Wanted, Show Me Love (America)

You should've known I love you  
Though I'll never say it too much  
Maybe you didn't get me  
Maybe I'll never know what I done

Now I'm lost in the distance  
You look at me like a stranger  
Cause how it looks right to me  
That you were scared of the danger

I could've shown you America  
All the bright lights in the universe  
We could have reached, the highest heights  
A different place, a different life  
Remember that night underneath the stars  
For a minute I thought the world was ours  
All you had to do was show me love

Yeah it's true you know, we're not perfect  
There's a fire inside of me  
It means I'll fight for the things that are worth it  
If it makes me feel complete  
Cause I'm hitting rocks, and I'm taking shots  
I'm prepared to lose everything I've got

Now I'm lost in the distance  
You look at me like a stranger  
Cause how it looks right to me  
That nothing can save us

I could've shown you America  
All the bright lights in the universe  
We could have reached, the highest heights  
A different place, a different life  
Remember that night underneath the stars  
For a minute I thought the world was ours  
All you had to do was show me love

Show me love, love  
Show me love, love  
Show me love, show me show me love...  
Show me show me love...  
Show me love

I could've shown you America  
All the bright lights in the universe  
We could have reached, the highest heights  
A different place, a different life  
Remember that night underneath the stars  
For a minute I thought the world was ours  
All you had to do was show me love

All you had to do was show me love
